

Music, Science, Inspiration

2024 | Season #2

The Series Music, Science and Inspiration was born out of a profound vision to create a platform on campus where an open dialogue and meaningful inspiration are established between Scientists, Engineers, and Artists.

Each session includes an open conversation, a research presentation, an interactive lecture, and a live performance presented by faculty members, guest artists, students and staff. The Series was established by Dr. Orit Wolf, who was appointed to be the Artist in Residence at the Technion in its first year, in 2022-2023.

Wednesdays | 15:00-16:30 | David and Janet Polak Visitor Center, Technion
